The SunGard Availability Services Sacramento, CA data center delivers enterprise-class colocation and managed services that help customers improve IT operations while also reducing costs. Organizations can cut capital expenditures while continuing to fuel innovation and growth by utilizing SunGard's services.

SunGard Availability Services has more than 35 managed services data centers in North America and Europe and a dedicated global network backbone. Our more than 3,600 managed services customers benefit from best practices backed by an ITILv3 service-centric model, SAS 70 Type II & ISO9001 certifications and PCI DSS-compliant facilities and processes.

The Sacramento facility offers:
- Hosting Services
- Messaging and Collaboration Services
- Network and Managed Security Services
- Backup and Replication Services
- Colocation Services

The center's optimal location, one of the most stable geographic locations in California, outside fault zones and flood plains, makes it an excellent option for hosted primary and replicated systems.
